Table of Contents
Diagnostic Imaging principles and concepts are augmented by the presentation of images for common clinical conditions. Guiding principles related to minimizing radiation exposure and requesting the most appropriate imaging examination are addressed.

1: Introduction
- 1.1: Online DICOM Image Viewer (ODIN)- An Introduction and User Manual
- 1.2: CanMEDS Roles
- 1.3: CAR – Diagnostic Imaging Referral Guidelines
- 1.4: ACR – Appropriateness Criteria
- 1.5: Choosing Wisely – Canada
- 1.6: Image Gently
- 1.7: Introduction – References

2: Principles of Radiation Biology and Radiation Protection
- 2.1: Principles of Radiation Biology and Radiation Protection – References
- 2.2: Introduction
- 2.3: Radiation in Medical Imaging- The x-ray Tube
- 2.4: Ionizing Radiation- Basic Concepts
- 2.5: Radiation Interaction with Biological Matter
- 2.6: Classification of Radiation Damage
2.7: Radiation Protection for Healthcare Workers
2.8: Radiation Protection for Patients
2.9: Ionizing Radiation- Fetus and Neonate
2.10: Appropriateness of Imaging Guidelines

3: Principles of Imaging Techniques
3.1: Principles of Imaging Techniques – References
3.2: Introduction
3.3: X-rays
3.4: Mammography
3.5: Fluoroscopy
3.6: Angiography
3.7: Computed Tomography (CT)
3.8: Ultrasound (US)
3.9: Magnetic Resonance Imaging (MRI)
3.10: Nuclear Medicine

4: Contrast Media in Radiology
4.1: Contrast Media in Radiology

5: Approach to Reviewing X-ray Imaging
5.1: General Approach to Reviewing x-ray Imaging
5.2: Approach to the Chest x-ray (CXR)
5.3: Approach to the Abdominal x-ray (AXR)
5.4: Approach to Bone and Joint x-rays

6: Brain and Spine
6.1: Intracranial Hemorrhage – Traumatic
6.2: Ischemic Stroke
6.3: Tumours of the Brain
6.4: Hydrocephalus
6.5: Low Back Pain
6.6: Spine Fracture
6.7: Brain and Spine – References
7: Breast
- 7.1: Introduction to Breast Imaging
- 7.2: Palpable Breast Mass
- 7.3: BI-RADS
- 7.4: Breast – References

8: Cardiovascular
- 8.1: Normal, Labelled, Chest x-ray, with Cardiovascular Structures
- 8.2: Enlarged Cardiac Silhouette
- 8.3: Aortic Dissection and Aneurysm
- 8.4: Congestive Heart Failure
- 8.5: Cardiovascular – References

9: Chest
- 9.1: Multiple Lung Nodules
- 9.2: Pulmonary Thromboembolism
- 9.3: Chest – References
- 9.4: Normal, Labelled, Chest x-ray
- 9.5: Tubes and Catheters
- 9.6: Atelectasis
- 9.7: Lobar and Lung Collapse – Suspected Lung Malignancy
- 9.8: Pleural Effusion
- 9.9: Pneumonia
- 9.10: Pneumothorax
- 9.11: Emphysema
- 9.12: Solitary Lung Nodule

10: Gastrointestinal and Abdominal
- 10.1: Gastrointestinal and Abdominal – References
- 10.2: Cholecystitis
- 10.3: Intestinal Perforation- Pneumoperitoneum
- 10.4: Ileus
- 10.5: Intestinal Obstruction
- 10.6: Appendicitis
- 10.7: Diverticulitis
• 10.8: Toxic Megacolon
• 10.9: Liver Tumour
• 10.10: Jaundice

• 11: Gynecology and Obstetrics
  • 11.1: Benign and Malignant Tumours of the Female Reproductive System
  • 11.2: Normal Pregnancy
  • 11.3: Ectopic Pregnancy
  • 11.4: Placenta Previa
  • 11.5: Gynecology and Obstetrics – References

• 12: Head and Neck
  • 12.1: Thyroid – Palpable Nodule
  • 12.2: Facial Trauma
  • 12.3: Sinusitis
    • 12.3.1: Mastoiditis
  • 12.4: Retropharyngeal Abscess – Child
  • 12.5: Epiglottitis – Child
  • 12.6: Head and Neck – References

• 13: Interventional
  • 13.1: Vascular (Invasive)
    • 13.1.1: Inferior Vena Cava Filter
    • 13.1.2: Interventional
      • 13.1.2.1: Vascular – References
    • 13.1.3: Percutaneous Biopsy
    • 13.1.4: Percutaneous Fluid Drainage
    • 13.1.5: Venous Access

• 14: Musculoskeletal
  • 14.1: Ankle Trauma, Fractures
  • 14.2: Degenerative Joint Diseases – Hip
  • 14.3: Erosive Arthritic Condition – RA
  • 14.4: Musculoskeletal Radiology – References
  • 14.5: Clavicle Fracture
14.6: Acromioclavicular Joint Separation
14.7: Rotator Cuff
14.8: Glenohumeral Dislocation – Anterior and Posterior
14.9: Elbow Fractures
14.10: Hand and Wrist Fractures
14.11: Pelvic Fracture
14.12: Hip Fracture – Femoral Neck Fracture
14.13: Knee Trauma – Acute Fractures

15: Pediatric
15.1: Non-Accidental and Accidental Trauma
15.2: Foreign Body Ingestion
  15.2.1: Aspiration
15.3: Urinary Tract Infection and Suspected Vesico-Ureteral Reflux
15.4: Pyloric Stenosis
15.5: Tumors Unique to Children – Wilms Tumour
15.6: Pediatric – References

16: Urogenital
16.1: Urinary Tract Calculus
16.2: Renal Tumour
16.3: Hematuria
16.4: Testicular Tumour
16.5: Testicular Torsion
16.6: Urogenital – References

17: Normal, Reference Images, Unlabelled and Labelled
17.1: Head and Neck
17.2: Chest
17.3: Abdomen
17.4: Pelvis
17.5: Musculoskeletal
17.6: Pediatric
