Urogynaecology is a surgical sub-specialty of urology and gynecology. The field of urogynaecology has expanded dramatically over the past decade with the advent of a number of new medical and surgical treatment modalities. The evidence base on pelvic floor dysfunction has also grown extensively. This multicontributor text, authored by a multi-disciplinary team of experts from around South Africa, concisely summarizes the most up-to-date concepts and management strategies in urogynaecology. It will prove invaluable to gynaecology, urology and surgery registrars and specialists. Physiotherapists and nurses working in the field of urogynaecology will also find it extremely useful.
