Table of Contents

Before new interventions can be used in disease control programmes, it is essential that they are carefully evaluated in “field trials”, which may be complex and expensive undertakings. Descriptions of the detailed procedures and methods used in trials that have been conducted in the past have generally not been published. As a consequence, those planning such trials have few guidelines available and little access to previously accumulated knowledge.

- **1: Introduction to field trials of health interventions**
  - 1.1: Scope of the book
  - 1.2: Outline of contents
  - Section 3:
  - Section 4:
  - Section 5:
  - Section 6:

- **10: Censuses and mapping**
  - 10.1: Introduction to conducting censuses and mapping
  - 10.2: Uses of maps and censuses in intervention trials
  - 10.3: Preparations for a census
  - 10.4: Enumeration
  - 10.5: Processing of census data
  - 10.6: Post-enumeration checks and quality control
10.7: Keeping the census up to date: demographic surveillance
References

11: Randomization, blinding, and coding
• 11.1: Introduction to randomization, blinding, and coding
• 11.2: Randomization schemes for individual participants
• 11.3: Randomization schemes for community or group-based interventions
• 11.4: Blinding
• 11.5: Coding systems
• 11.6: References

12: Outcome measures and case definition
• 12.1: Introduction to outcome measures and case definition
• 12.2: Types of outcome measures
• 12.3: Factors influencing choice of outcome measures
• 12.4: Variability and quality control of outcome measures
• References

13: Preliminary studies and pilot testing
• 13.1: Introduction to preliminary studies and pilot testing
• 13.2: Preliminary studies
• 13.3: Pilot testing
• References

14: Questionnaires
• 14.1: Introduction to questionnaires
• 14.2: The questions
• 14.3: The questionnaire
• 14.4: The interviewers
• 14.5: Data capture
• 14.6: The interview
• Appendix
• References
15: Social and behavioural research

- 15.1: Purposes of social and behavioural research in intervention trials
- 15.2: Social and behavioural research in evaluation
- 15.3: Commonly used methods in social research
- References

16: Field organization and ensuring data of high quality

- 16.1: Introduction to field organization and ensuring data of high quality
- 16.2: Manual of field operations and study diary
- 16.3: Personnel issues
- 16.4: Physical location and facilities
- 16.5: Equipment and supplies
- 16.6: Timetable for field activities
- 16.7: Ensuring data of high quality
- 16.8: References

17: Field laboratory methods

- 17.1: Introduction to field laboratory methods
- 17.2: Sample collection
- 17.3: Labelling and storage
- 17.4: Documentation of laboratory procedures
- 17.5: Quality control and quality assurance
- 17.6: Accreditation and links between laboratories
- 17.7: Coding and linkage of results
- 17.8: Laboratory health and safety
- 17.9: References

18: Budgeting and accounting

- 18.1: Introduction to budgeting and accounting
- 18.2: Budgeting
- 18.3: Accounting
- 18.4: Budget monitoring
- 18.5: Accounts summaries and auditing
- 18.6: Prevention of fraud and other losses
- 18.7: Glossary of financial terms
19: Intervention costing and economic analysis

19.1: Introduction to intervention costing and economic analysis
19.2: Types of economic analyses
19.3: Framing the analysis
19.4: Health intervention costs
19.5: Presentation of results
19.6: Generalizability
19.7: Modelling
19.8: Publication of findings

2: Types of intervention and their development

2.1: Introduction to types of intervention and their development
2.2: Types of intervention
2.3: Evolution of new intervention products and sequence of study phases
2.4: References

20: Data management

20.1: Introduction to data management
20.2: Before starting to collect data
20.3: Planning the data flow
20.4: Data collection systems
20.5: Managing data
20.6: Archiving
20.7: Preparing data for analysis

21: Methods of analysis

21.1: Introduction to methods of analysis
21.2: Basics of statistical inference
21.3: Statistical analysis plan
21.4: Analysis of proportions
21.5: Analysis of rates
21.6: Analysis of mean values
21.7: Controlling for Confounding Variables
21.8: Analyses when communities have been randomized
21.9: Prevented fraction of disease
References

22: Phase IV studies
22.1: Introduction to Phase IV studies
22.2: Types of Phase IV study
22.3: The conduct of Phase IV studies
22.4: Examples of real-world effectiveness studies
References

23: Reporting and Using Trial Results
23.1: Planning communications
23.2: Communication before and during the trial
23.3: Reporting the final results
23.4: From research findings to public health action
Appendix
References

3: Reviewing the literature
3.1: Introduction to reviewing the literature
3.2: Systematic reviews
3.3: Software available for systematic reviews and meta-analyses
3.4: Reporting findings from systematic reviews
3.5: References

4: Trial design
4.1: Introduction to trial design
4.10: Analysis, monitoring, and reporting
4.11: The ‘SPIRIT’ checklist for standard protocol items for clinical trials
4.12: References
4.2: Definition of trial objectives
4.3: Selection of interventions
4.4: Allocation of interventions within the trial
4.5: Choice of outcome measures and trial duration
4.6: Trial population
4.7: Implementation
4.8: Data handling
4.9: Quality control

5: Trial size
5.1: Introduction to trial size
5.2: Criteria for determining trial size
5.3: Size to give adequate precision
5.4: Size to give adequate power
5.5: More complex designs
5.6: Interventions allocated to groups
5.7: Other factors influencing choice of trial size
5.8: The consequences of trials that are too small
5.9: Computer software for sample size calculations
References

6: Ethical considerations
6.1: Introduction to ethical considerations
6.2: Widely accepted ethical principles concerning research on human subjects
6.3: Special issues in field trials in low- and middle-income countries
References

7: Trial governance
7.1: Introduction to trial governance
7.2: The trial sponsor
7.3: Steering committee
7.4: Data and Safety Monitoring Board
7.5: Trial registration
7.6: References

8: Preparing grant applications
8.1: Introduction to preparing grant applications
8.10: Further advice
8.2: Grant awarding agencies
8.3: Grant types
8.4: Grant awarding process
8.5: Developing the proposal
8.6: Responding to referees
8.7: Funding decision
8.8: Common problems in grant applications
8.9: Roles and responsibilities
References

9: Community engagement
9.1: Introduction to community engagement
9.2: Planning and initiating community engagement
9.3: Engaging community stakeholders
9.4: Strategy and content of information for communication
9.5: Sustaining community engagement
