24.6: Chapter 6 (Neurological Assessment)

Answer Key to Chapter 6 Learning Activities

1. D – remove obstacles when ambulating (Rationale: Cranial nerve II is the optic nerve, which governs vision. The nurse can provide safety for the visually impaired client by clearing the path of obstacles when ambulating.)

2. A – cerebral function (Rationale: The mental status examination assesses functions governed by the cerebrum. Some of these are orientation, attention span, judgment, and abstract reasoning.)

Answers to interactive elements are given within the interactive element.
