24.9: Chapter 9 (Cardiovascular Assessment)

Answer Key to Chapter 9 Learning Activities

1. C – Heart Failure (Rationale: The patient’s symptoms indicate fluid volume overload and reflect a clinical diagnosis of heart failure)
2. B – Stay with the patient and notify the HCP of the ECG results (Rationale: The patient’s cardiac rhythm change is reflective of an abnormality. This change should be communicated to the healthcare provider).

Answers to H5P interactive elements are given within the interactive element.
